

Fillable PDF Documents

This information pertains to the Community Grant Program Funding Application.

Opening a fillable PDF

- When a user clicks on the link to a fillable PDF, the below error message may pop up:

- If this message pops up the user should:
 1. Check which browser he/she is using. This problem is typically experienced by users on the Google Chrome browser. A good first step would be to attempt opening the document in a different browser (e.g. Firefox or Internet Explorer)
 2. Alternatively, the user could download the document, close the internet browser, and open the document through his/her downloads folder. This will open the document through Adobe Acrobat, wherein the document should open correctly.

Saving a fillable PDF

- After filling out a fillable PDF, when a user attempts to “save” the document, it may not save under the existing file name.
- After making changes to a fillable PDF, the user may have to update the name of the document when saving it.
- For example, if the user has the document saved in his/her downloads folder as “Application Form,” he/she can simply change the name to “Application Form 2” and then he/she will be able to save the edited document.

Additional problems

For additional concerns/issues with fillable PDF forms for the Community Grant Program, please contact Jenna at 780-740-8059.

Hard copies of the documents are also available at Government Centre (131 Civic Centre Road).
