and Community Services
SAFE VISITATION

The McMan Safe Visitation Program provides a safe, non-threatening, neutral environment for visits between children and non-custodial parents, where family violence has been an issue.

The Safe Visitation Program has a structure that allows the child(ren) to maintain a desired relationship with the non-custodial parent while providing safety for the child and custodial parent, in the period following separation or divorce. The program also provides resources and learning opportunities to parents to aid in working through this time and allow for healthy relationships between parents and their children.

Call (780)778-3290 for program details and information on the referral process.
There is no cost to participants.
